SHORT COURSE TRAINING OPPORTUNITIES

FOR HEALTHCARE PROFESSIONALS

Strategic Management & Leadership in Primary Care (40 CATS)

The Strategic Management and Leadership module is designed to equip primary care practitioners with advanced leadership and management skills.

Stepping up to Leadership & Management in General Practice (20 CATS)

This module empowers GP leaders to explore and enhance their personal and professional growth. By reflecting on the synergy between skillset and mindset, leaders will develop strategic leadership capabilities and create impactful development plans.

Social Model for Health & Wellbeing in Primary & Community Care (20 CATS)

This short course will provide students with a knowledge of the Social Model of Health, as a driver for change in health and social care, including the introduction of community-based services such as Social Prescribing.

Delivering Clinical Trials - from Protocol to Patient (20 CATS)

The Clinical Trials short course provides participants with foundational knowledge of clinical research delivery, focused on clinical trials.
